

ABOUT eFACTO™ lite

eFacto™ lite is a micro ERP system to manage central warehouse, remote warehouses, sales depots and POS stores. The system allows you to control inventory, purchase or manufacture before inventory is out of minimum required level, know cash at POS counter, collect customer data to interact with them in future, maximize business efficiency and reduce cost.

The system is able to integrate all warehouses, sales depots and POS locations using online and offline data consolidation methods. Consolidated data is available at central server site for management’s monitoring and control.
